

Impact Report 2022-3

"EC has played an crucial role in the development of welltrained, passionate, and committed conservation leaders". - ZCP

Introduction

Elephant Charge is a fundraiser organisation investing in the future "health" of Zambia's environment. Elephant Charge UK is a charity registered in the UK (No. 1203341) and Elephant Charge Ltd is a non profit company registered in Zambia. Both organisations have the same goal – funding the incredible work of conservation organizations and conservation education initiatives throughout the country. And both are managed by volunteers, with some overlap.

Zambia has incredible natural recourses from wilderness and wildlife, to waterways and wetlands, from grassland to forests but "Zambia ranks among the countries with the highest levels of poverty and inequality globally" (World Bank). With the population predicted to double by 2025, there is considerable pressure on the habitats and environment. Without a change of mindset and putting a higher value on the environment, the country is set to face a future with a severely degraded environment.

Established in 2008, EC Zambia has raised \$1,800,000 through hosting an annual 4x4 event with teams competing to complete a course in the shortest distance. It is the largest fundraiser for conservation in Zambia. EC UK was established in 2023 and will be raising funds from UK and Europe based corporates and individual donors. In 2024, EC USA will be registered as a 501c nonprofit organisation. This gives the concept of Elephant Charge, a conservation fundraiser, a more global platform for fundraising.

"...nurturing an environmentally aware mindset and building a conservation culture, in both the youth throughout the country and the communities living in sensitive areas"

Supporting conservation work through 3 pillars:

CONSERVI

Conservation Education

Human Wildlife Co-existence

TAR

Conservation Field Work

to meet the following objectives

- To strengthen "conservation education" in schools across the country, more especially in eco sensitive areas
- To stimulate and support the development of young conservationists and emerging eco warriors
- To create an environmentally aware mindset and behavior change, particularly in communities living near protected areas
- To support mitigation in critical Human-Wildlife Coexistence zones
- To provide funding for field conservation work and essential capital expenditure
- To create a wide reaching, eco-active community of Chargers, Sponsors, Supporters and Conservationist in Zambia

Beneficiaries 2022-3

Wildlife & Environmental Conservation Soc of ZA	\$27,143	
Chipembele	\$16,286	
CLZ - Conservation Lower Zambezi	\$16,286	
Musekese	\$16,286	
BirdWatch	\$16,286	
CSL - Conservation South Luangwa	\$16,286	
GRI - Game Rangers International	\$16,286	
Kasanka Trust	\$16,286	
ZCP - Zambian Carnivore Program	\$16,286	
KFRP - Kafue Flats Restoration Partnership	\$16,286	
Chimfunshi Wildlife Orphanage (CWOT)	\$7,429	
CATS	\$7,429	
Nsumbu Tanganyika Conservation Programme	\$7,429	
Project Luangwa	\$4,800	

Totals \$200,800

Combined impact of these funds spent in 2023

Conservation education

The funds raised by Elephant Charge are focused on impacting the youth from a young age through to supporting the development of conservation leaders and champions.

60,000 kids in 1800 school

clubs had ongoing conservation education.

This is only **11%** of the government schools. The goal is to continue to expand the conservation school clubs across the country.

Messaging through media

TV programs - 13 reaching 1,500,000 Radio programs - 70 programs reaching an estimated 1,840,000 listeners via 17 radio stations out of Zambia's 111 radio stations (15%)

The combined direct social media reach of the beneficiaries, promoting conservation and also Elephant Charge is **570,000**

EC Beneficiaries supporting further education in the natural sciences:

17 student interns24 graduate interns9 master degree holders76 developing leaders & 21 managers
